INSPIRE CATALOGUE

Luxurious handmade collections.
Skillfully designed, traditionally crafted.

Welcome to the world of crystal

Cerva Bohemia and KVETNA 1794 are running one of the oldest hand-made glass factory in the world and are dedicated to creating the world's finest hand-blown glassware.

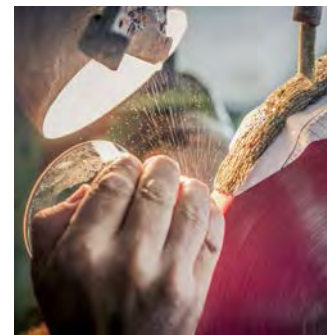

Located in the very heart of Central Europe, our glassworks has been producing drinking and decorative glass for centuries. Inspired by leading designers across several eras, the Cerva Bohemia and KVETNA 1794 collection offers an exclusive selection of classic and modern glassware.

We pride ourselves in our high-quality lead-free molten glass and flawless processing, as well as our contemporary and traditional approach to design. To ensure superior quality and unique craftsmanship, we apply state-of-the-art technologies to our traditional manual glassmaking methods.

We are thrilled to present you with our latest designs and most focused core collections for 2020. We've also had the pleasure of collaborating with leading Czech and international designers to bring you our unique designer collection.

We hope you enjoy our luxurious handmade glassware collections.

Lubor Cerva

Vision

We aim to become the world's leading handmade Bohemian glassware brand with luxurious, exquisite beauty at its heart.

We combine our rich heritage of craftsmanship and material understanding with strong design. Whether traditional or contemporary, our glassware has a global appeal to consumers who appreciate exceptional quality.

Tarvos

This new collection is bold, confident and expressive.

The Tarvos collection was designed to create a wine set with an attractive and unusual shape to differentiate it from classic contemporary glasses. These luxurious glasses feature an exceptional light hand design that gives each piece a striking new dimension and a height that makes it stand above other classic collections. This line is for customers who want to experience their favorite wines in unique sumptuous glasses. We have expanded this collection from wine glasses, so it now also includes tumblers, decanters, and a brandy glass.

Telesto

We developed this new collection in collaboration with wine connoisseurs, creating a range of functional glasses of the highest quality for exclusive wines. Our aim with this collection was to give wine lovers more enjoyment of the various bouquets and flavors of top-quality wines. Each hand-blown glass is weighted perfectly for experiencing wine with a touch of elegance and flair. Telesto's passion for detail extends throughout the collection, as each piece visually complements the proportions of a wine bottle.

Arche

When one of the best designers and artists meets a glassworks with a long tradition, something extraordinary arises.

In the case of the Arche collection, it was Rony Plesl who designed a set of tumblers for the KVĚTNÁ 1794 glassworks, which combine captivating elegance and luxury with incredible playfulness. The bottom of the glasses with an opulent lens is the basis for your imagination. It's up to you whether the glasses on your table will swing gently or you will spin them with them. But one thing is clear, you will not be bored with the Arche collection!

Dekanter

Handmade lead-free decanters are designed to decant wine a few hours before serving. This ensures the full development of the bouquet and allows the wine to reach a degree of maturity that would otherwise only be achieved through long-term storage.

Aeration allows the wine to 'breathe'. The decanter is meant to stimulate the oxidation processes that triggers the release of more aromatic compounds.
